The Evolution of Digital Learning, From K-12 to Higher Education

How to Lead with eLearning Using Avaya Cloud Office® by RingCentral

- **Over 70% of K-12 teachers** say blended learning increases student engagement

- **82% of higher ed students** say they want at least some of their classes to take place online.

- These online approaches have been proven to save around $2,400 per student

Digital learning is here to stay, but it needs to get better. As schools move away from emergency remote teaching to well-planned online learning, hybrid learning (where some students attend class in-person while others join virtually from home) and blended learning (which integrates technology and digital media with traditional instructor-led classroom activities) have proven to be successful **from kindergarten** to **college**.

An exciting new era of education offers significant benefits across the board. Avaya enables schools to seize these benefits to the fullest with its award-winning cloud communications solution, Avaya Cloud Office.

Avaya Cloud Office is the best kept secret of eLearning leaders.

Avaya Cloud Office is a powerful cloud-based solution that provides all the communication and collaboration features schools need – calling, text, chat, meetings, file and desktop sharing, task management – with enterprise-grade quality, reliability, and security (ensuring compliance with Kari's Law and the Ray Baum's Act). It's an all-in-one solution that can be used anytime, anywhere, and on any device via an accessible browser interface.

The solution offers crucial security and reporting capabilities and can seamlessly integrate with today's top Learning Management Systems like Blackboard and Canvas to make online learning truly secure and seamless for students and staff.

Enable True Student-centered Learning

Avaya Cloud Office extends the walls of the traditional classroom, empowering students to learn in new ways, in new places, and with connections to new resources:

- Give students control over when and how they learn outside the classroom with a range of touchpoints between teachers and student peers (i.e., phone calls, small group instruction, targeted feedback).

- Allow students to communicate with their instructors through multiple connected channels of their choice (voice, video, chat, text).

- Provide a single learn-from-anywhere app that can be used on any device (even devices without high-performance or high-capacity data storage) using just an Internet browser.

Give Teachers the Support and Flexibility They Need

Avaya Cloud Office feels second nature to teachers and provides a platform for personalization and creative problem solving. The solution lightens teachers' load at a time when it's so very full.

- Try new teaching techniques, create breakout rooms for students to work in small groups, or try a digital curriculum using multiple channels like chat, task assignment, and video (live or recorded).

- Collaborate with faculty via calls or private or group chats from your phone, computer, or tablet; make everyone feel like they're in the same room with virtual meetings on an app or browser.

- Connect with faculty, parents, and students from anywhere without needing multiple apps. Avaya Cloud Office does it all so you can ditch duplicate collaboration apps or integrate them for one seamless user experience.

- Integrate your Learning Management System to provide an even more seamless user experience with expanded capabilities. Avaya Cloud Office supports 200+ integrations with business and education-specific apps like Blackboard, Canvas, Moodie, Brightspace by DL2, and Google Workspace.

Administrative Benefits

Online learning benefits school IT administrators just as much as students and faculty, saving time and money.

Avaya Cloud Office extends the walls of the traditional classroom, empowering students to learn in new ways, in new places, and with connections to new resources.

AVAYA

Take your school's first step by exploring Avaya's special pricing on Avaya Cloud Office specifically for education customers.

- Avaya Cloud Office automatically updates on a quarterly basis without any disruption or downtime. You'll be first to start using new features that improve the user experience, you'll never have to worry about security or compliance, and you'll instantly get access to new integrations that enhance the system's functionality. Best of all, you'll save time and money.

- Find out how things are really going with easy-to-use reporting. Create your own dashboards to track things like connectivity, quality of service, call volume, and more.

Digital learning environments are permanently changing the face of education. Keep up by implementing cloud communications technology that works with your learning technology and enables digital avenues for students and instructors to meet.
